

Hi, my name is Erica Martch, and I am the presidential candidate for the MEFE party.

A crucial part of presidential campaigns is considering what you want the future of the country to look like. What kinds of people do you want to be doing the decision making for our government? What kind of morals must those people have? And most importantly would they make the best choices for the people as a whole? Our main goals as the leaders of America would be to prioritize the safety and security of the people in all aspects. We promise to guarantee all citizens their constitutionally promised rights, regardless of age, race, or sexual identity. We will preserve and protect these rights to ensure that all people are treated equally and fairly. The MEFE party also believes that all people should have equal access to all kinds of medical plans, employment, and healthcare. And regarding healthcare, people should have access to every kind of healthcare that the individual decides is necessary. One of our main goals is to support planned parenthood in their mission "to ensure that all people have access to the care and resources they need to make informed decisions about their bodies, their lives, and their futures." We plan to work together with other countries to create the best communication and trading system possible. Another main goal is to address the issue of North Korea and its problematic history and the Uighur camps in China which are internment camps located across their country. We believe that both of these issues should be immediately addressed because of their direct impact on the people of those two countries and the threat that those countries could potentially oppose to us. By voting for Elliot Morse and I, you will be benefiting the country by guaranteeing all of us a brighter future.

Thank you
